Make Low-Light Operations safe and efficient with ANY video input or tool!

C3I's NVIS Friendly Monitor features 3 unique modes tailored to provide a high level of function without reducing situational awareness, regardless of environment. Swap to the mode that fits your needs at the touch of a button!

- Daylight – Bright, full-spectrum display for optimum readability.
- NVIS Friendly – full-color mode supporting Class-B night vision devices.
- Red Mode – Preserve un-augmented night vision.

All modes are fully dimmable with a level of control that far exceeds industry standards.

Retains industry standard mounting devices (VESA or Desktop)

The full-color NVIS mode ensures GUIs retain the same data as seen in daylight mode

NVIS Monitor display screen with NVIS Friendly Mode selected – 24" or 27"

Back view of the Monitor with the driver module box installed on COTS monitors

NAVAIR LKE Approved!

Slated for install on LPD28 in 2024!

Red Mode selected which can be dimmed to support un-augmented night vision

NVIS Mode selected for full-color video without impacting NVDs
